The Robert Sorby SteadyPro

Robert Sorby

*Steady***PRO**

Turning Made Easy

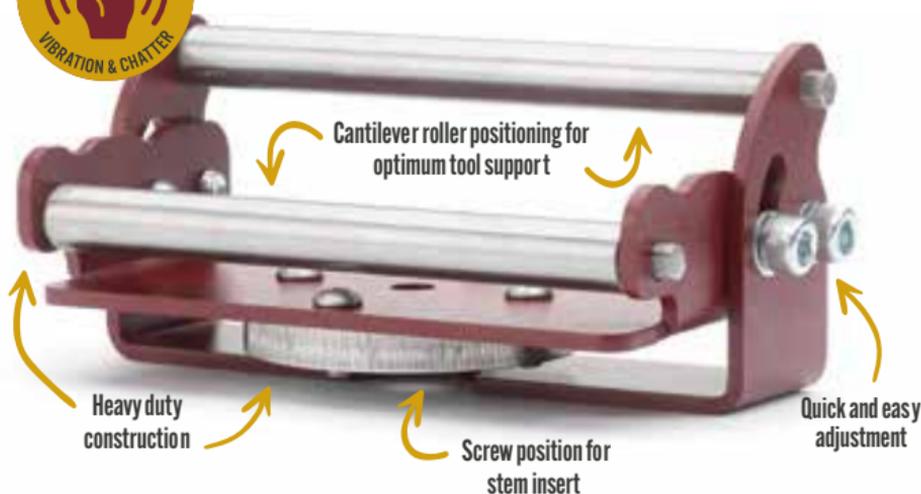

The Robert Sorby **SteadyPro** is a very easy to use jig that gives additional tool support when hollowing as well as many other woodturning operations.

The versatile **SteadyPro** fits a wide range of woodturning lathes by utilising the stems from the Robert Sorby modular tool rest system.

The easy to adjust cantilever action of the clamping rollers, ensures the optimum control for a large selection of tool sizes.

The **SteadyPro** system can be used with recommended Robert Sorby woodturning tools and many other woodturning tools.

Features & Benefits

WARNING

This product must be used with care and appropriate PPE worn during use.
Please read before use.

Step-by-Step Guide

STEP 1

Turn the **SteadyPro** over to access the stem fitting location

STEP 2

Screw the stem into the base of the **SteadyPro** and lock into position

The Robert Sorby SteadyPro

STEP 3

Insert the stem into the lathe banjo

STEP 4

Place the desired tool onto the lower roller and adjust the height of the stem in the banjo, so the cutting edge of the tool is at the required position and lock the stem into place

Step-by-Step Guide

STEP 5

Slacken the cantilever locking screws and adjust the upper roller until it sits securely on the top of the tool shaft and lock into position

STEP 6

The rollers allow the user to move the tool lightly from left and right whilst being held securely

SteadyPro - Top Tips

- Always ensure that all bolts and locking handles are locked into position before starting to use the SteadyPro
- Ensure the upper roller is sitting securely on the top of the tool without hindering the correct operation
- Maintain tool shaft contact with both rollers at all times during use

For more user information on the SteadyPro, please refer to our website
